## 3407-4 EVEL KNEIVEL™ STUNT CYCLE WITH FIGURE

It's excitement from the word go with Evel Knievel and his high flying cycle that does wheelies, jumps, and flips... performing just about every maneuver known to the real Evel and even a couple Evel can't do! What makes it all possible? The patented gyro-mechanism that makes this the only two-wheel cycle of its kind—assuring a perfect landing every time. And Evel himself comes through with flying colors! Seven inches high, dressed to the hilt in Evel's official uniform, with removable helmet and swagger stick, he all but comes to life as he moves agilely into different positions leaving his audience breathless with his dare-deviltry. The starting point for all this action... a powerful booster that the cycle fits into, and a winder that sets it all off. It's fun to zoom—for all adventure loving youngsters.
